Education

San Jose State University   **Graduation: May 2023**

B.S. Software Engineering | Charles W. Davidson College of Engineering

● **Cumulative GPA: 3.66**

● Relevant Coursework: Algorithms, Computer Architecture, Data Structures, Discrete Mathematics, Multivariable Calculus, Probability & Statistics in Engineering, Software Engineering I,II

Work Experience

IBM Accelerate Software Track   June 2021 - August 2021

Software Engineer Trainee

● Led a team of 10 Software Engineer Trainees through web development labs with IBM developers and my team won the top 2 out of the 40+ teams at the end.

● Implemented 5 functional web applications using JavaScript(React.js), Node.js and Express.js.

● Passed biweekly HackerRank Assessments focusing on JavaScript and React principles.

StemAway   June 2021 - August 2021

Full Stack Developer Intern

● Configured and built a theme and plugin for an open source community forum software, Discourse.

● Delivered project reports and timeline updates during a weekly executive group meeting, responding to questions and feedback to help them stay up to date and catch bugs.

CodePath iOS program   January 2021 - May 2021

Software Engineer Trainee

● Committed 20+ hours a week participating in Facebook-based workshops and building iOS applications with RESTful API clients.

● Optimized 5 functional applications such as Rotten Tomatoes, Twitter with Swift and completed with honors (110%).

Projects

Blog (2021) *React.js, Node.js, MongoDB*

● Blog is a social networking website where users can post memories with a picture that users want to keep in mind, and posts can be updated anytime.

● Full-Stack Developer: implemented MERN features including managing memories, and profile page for users.

● More information on the project can be found here: https://blogooo.herokuapp.com/

Fin-Chat (2021) *React.js*

● Created a full RealTime Chat Application with Social Auth and dedicated chat APIs/sockets.

● All events are listening to any essence of the application and users can check messages actively and instantaneously.

● Configured and designed authentication(Sign-in and Sign-out using Firebase), and sending and searching messages.

● More information on the project can be found here: https://finchatgo.netlify.app/

Skills

● Programming Languages - Java, JavaScript, Swift

● Frameworks and Technologies - React.js, Node.js, Firebase, MongoDB, Express.js, UIKit, MATLAB
